Dimplex Oil-Free Eco Columns look like an Oil Column heater, but with one big difference. They contain no oil! The patented Dimplex Drytech element means faster, more efficient heating - based on a 2.4kW Dimplex Oil Free Eco Column compared to a Dimplex Oil Column heater on medium/high usage during the winter season. No Oil means up to 8 times faster heat up, resulting in less power usage to maintain temperature. Environment benefits from oil free with lowering the impact on the carbon footprint and making it easier to recycle once product has reached end of life.
